EDUCATION

College Of Engineering Roorkee

Bachelor of Technology in Computer Science, Minor in AI/ML

Aug. 2021 – May 2025

CGPA – 8/10

Shri Guru Ram Rai Public School

Associate's in Science Stream (PCM)

Jun. 2019 – Mar. 2020

CGPA – 9/10

EXPERIENCE

Java Full-Stack Development Training, JSpider

Dec 2025 – Present

Noida

- Gained hands-on exposure to full stack java development, working across both client-side and server-side technologies throughout the training period.
- Architected and implemented backend services using Java, ensuring robust data flow and seamless integration with front-end components.
- Established and maintained RESTful communication standards across application layers, verifying endpoint behavior through structured API testing.
- Structured applications using layered design principles to promote modularity, maintainability, and scalability of the codebase.
- Developed functional web applications by bridging user interface design with server-side logic, reflecting practical software engineering workflows.
- Used Git/GitHub for version control and collaborative development.

PROJECTS

AI Chatbot Application

- Developed a full-stack AI chatbot integrating Groq LLaMA 3.3 API via Spring Boot REST services.
- Implemented topic-specific prompt engineering for 4 domains with clean MVC layered architecture.
- Built responsive dark-mode chat UI with real-time typing indicators and dynamic suggestion chips.
- Implemented runtime topic switching across College, Restaurant, Product and Hospital domains.
- Integrated Groq Cloud API as a cost-free OpenAI-compatible alternative using RestTemplate HTTP client.
- Deployed application on embedded Apache Tomcat server running on port 8080 via Spring Boot auto-config.

Employee Registration Application

- Developed a full-stack Employee Registration System using Java, Spring Boot, MySQL, HTML, CSS, and JavaScript.
- Designed a responsive frontend form for employee data collection and registration.
- Implemented MVC architecture with Controller, Entity, and Repository layers for better code organization.
- Implemented RESTful APIs using Spring Boot and Spring Web for handling employee registration requests.
- Integrated MySQL database to store employee information securely and efficiently.
- This project helped me understand real-time frontend, backend flow and REST API working.

TECHNICAL SKILLS

Languages: Java

Frameworks: Spring Boot, Hibernate

IT Constructs: Data Structures and Algorithm, OOPs

Other Tools: SQL, JDBC, Git, GitHub

CERTIFICATIONS

Java Programming (NPTEL 2024) : Gained proficiency in Java Programming Language

SQL Certification (NPTEL 2024) : Gained understanding of database management and query optimization.

Hackathon: 1st Prize in coding competition organized by COER university.
