EDUCATION

College Of Engineering Roorkee

Bachelor of Technology in Computer Science, Minor in AI/ML

Aug. 2021 – May 2025

CGPA – 8/10

Shri Guru Ram Rai Public School

Intermediate (PCM)

Jun. 2019 – Mar. 2020

CGPA – 9/10

EXPERIENCE

Java Full-Stack Development Training, JSpider

Dec 2025 – Present

Noida

- Practiced full-stack Java development, building REST APIs with Spring Boot and integrating them with React frontends.
- Built backend services following layered architecture (Controller-Service-Repository), focusing on clean separation of concerns.
- Tested and validated REST API endpoints using Postman, ensuring correct request-response behavior across application layers.
- Worked on structuring applications for modularity and maintainability, applying standard Java and Spring Boot design patterns.
- Developed end-to-end features connecting frontend UI with backend logic and MySQL-based data persistence.
- Used Git and GitHub for version control and collaborative development workflows.

PROJECTS

QuizSphere

- Built QuizSphere, a full-stack quiz platform using 9 Spring Boot microservices and React.
- Enforced JWT authentication at API Gateway, securing all downstream microservices from unauthorized access.
- Designed RESTful APIs following layered controller-service-repository architecture across independent Spring Boot microservices.
- Implemented event-driven communication using Apache Kafka for async notifications and real-time analytics.
- Integrated OpenFeign for synchronous inter-service calls, enabling real-time cross-service data validation.
- Designed database-per-service architecture using MySQL, ensuring service autonomy and complete data isolation.

AI Chatbot Application

- Developed a full-stack AI chatbot integrating Groq LLaMA 3.3 API via Spring Boot REST services.
- Implemented topic-specific prompt engineering for 4 domains with clean MVC layered architecture.
- Built responsive dark-mode chat UI with real-time typing indicators and dynamic suggestion chips.
- Implemented runtime topic switching across College, Restaurant, Product and Hospital domains.
- Integrated Groq Cloud API as a cost-free OpenAI-compatible alternative using RestTemplate HTTP client.
- Deployed application on embedded Apache Tomcat server running on port 8080 via Spring Boot auto-config.

TECHNICAL SKILLS

Languages: Java, JavaScript

Frameworks: Spring Boot, React, Hibernate

IT Constructs: Data Structures and Algorithm, OOPs, Collection framework

Technologies: MySQL, Git, GitHub, Postman

CERTIFICATIONS

Java Programming (NPTEL 2024) : Gained proficiency in Java Programming Language

SQL Certification (NPTEL 2024) : Gained understanding of database management and query optimization.

Hackathon: 1st Prize in coding competition organized by COER university.
